Thread: [Private crypto service for EXE/DLL/shellcode files | DLL Sideloadng \(DLL Hijacking\)](#)

C00dZero - February 3, 2026, 6:59 am

We crypt 32- and 64-bit software (x86/x64) - EXE/DLL/shellcode(.bin)

DLL/shellcode preferred

The crypt service is designed for bulk downloads, 24/7 cryptography, and the ability to upload unique files. Teamwork is possible.

- We don't encrypt software written using the .NET Framework.

Cryptor natively supports usage with DLL Sideloadng; all launch parameters are correctly passed to the payload.

Several DLL Sideloadng (DLL Hijacking) solutions are available for various purposes.

You can use the crypto with your own DLL Sideloadng wrappers, or use our solutions.

If your software requires special launch parameters, a DLL Sideloadng option can be discussed separately and customized.

Price:

One-time EXE/DLL/shellcode encryption - \$100

- For \$100, you receive 4 copies of the encrypted file at a time.

This one-time encryption is intended more to ensure that the encryption is suitable for you. We are interested in ongoing collaboration.

In light of recent events, such as the closure of the avcheck service by security services and the leaks, we offer a unique file encryption service on your end. We can only perform encryption cleaning on our end, without the need to transfer your software to us.

To clean antivirus signatures, we will only need partial information about your software.

With this setup, you will be completely protected from software leaks from the encryption service during cleanups.

We will provide instructions for setting up automated encryption and packer operations on your server. If you don't want to deal with this, a classic encryption service on our end is also available.

For regular customers, the crypto will cost less than \$5.

24/7 cleaning.

We also clean Windows Defender with cloud enabled.

Crypto is not responsible for the dynamic antivirus checks, as antivirus programs may react to certain software actions, such as downloading and running a file with a loader.

We have always maintained a cleanliness of 0/26 according to avcheck.net + local scans.

Please don't low quality post to bump threads. Add some value or use the built in bump feature.

Cruciferra - February 25, 2026, 6:47 am

Avcheck was seized how are you using it? anyway, good luck with your sales.

That's correct. This is just an example.

Currently, I'm using local scanners + the Kleenscan service.

C00dZero - May 20, 2026, 11:32 pm

You can place a wholesale order.

Personalized approach. Weekly subscriptions are available.

For regular customers, the crypto will cost less than \$5.

24/7 cleaning.

C00dZero - June 24, 2026, 6:03 am

Crypt EXE into EXE

Crypt DLL into DLL

Crypt shellcode:

shellcode into shellcode (*.bin into *.bin)

shellcode into DLL

shellcode into EXE

We crypt 32- and 64-bit software - EXE/DLL (except .NET)

We crypt shellcode (.bin) 32- and 64-bit - We can crypt shellcode written in .NET

C00dZero - July 6, 2026, 7:13 am

For those who need crypt service on a regular basis, there are affordable daily crypt subscriptions.

Price: \$500 per month.

C00dZero - July 15, 2026, 2:52 am

New antivirus bypass methods have been added. The obfuscator has been modified.

Stanley - August 11, 2026, 1:00 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page

and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
