Thread: [DARK DEPLOYER EXPLOIT KIT \[FUD\] \[LNK PDF IMG+\] \[SILENT DRIVE BY\] \[LANDING PAGES\]](#)

WraithTools - February 5, 2026, 12:02 pm

INTRODUCTION: A NEW ERA OF STEALTH EXPLOITATION

Dark Deployer Pro is not an evolution—it is a revolution. Built from the ground up to eliminate detection, streamline operations, and push the boundaries of exploit spreading, this tool replaces every exploit kit, payload generator, and C2 framework you've ever used.

No more fragmented workflows. No more static, detectable payloads. Just one tool that handles everything—from initial access to long-term persistence, that bypasses modern AV's and detection systems.

CORE FEATURES: THE ARCHITECTURE OF DARK DEPLOYER

FULLY UNDETECTABLE (FUD) EXPLOIT GENERATION

Dark Deployer Pro does not rely on old-school packers or simple obfuscation. Instead, it employs multi-layered, dynamic evasion to ensure zero static detection across all major AV/EDR solutions.

- LNK & PDF Injection
 - LNK Builder: Uses custom icon embedding and encrypted target paths to bypass static analysis engines. No more broken shortcuts—just flawless delivery.
 - PDF Generator: Embeds obfuscated JavaScript with runtime decryption, ensuring the payload only executes when triggered. Tested against VirusTotal, Hybrid Analysis, and ESET.
- Web-Based Drive-By Exploits
 - Pre-Built Landing Page Templates:
 - SVG Zero-Click Exploits (CVE-2023-XXXX, fully patched but still effective in legacy systems).
 - Mshta/HTA Bypass (Living Off the Land with built-in AMSI/ETW termination).
 - WMI & PowerShell Beacons (Fully obfuscated, no suspicious processes).
 - Custom Payload Droppers: Injects memory-only payloads via:
 - Steganographic Images (PNG/JPG, LSB embedding).
 - Base64-Encoded Scripts (Decrypted in-memory).
 - Alternate Data Streams (ADS) for off-disk persistence.

ADVANCED EVASION & ANTI-FORENSICS

Dark Deployer Pro does not just hide—it erases traces before they exist.

- AMSI & ETW Termination
 - Patches memory at runtime to disable Windows Defender telemetry before execution.
 - Blocks ETW logging to prevent process creation, network, and file I/O from being recorded.
- "Stealth Mode" (Pre-Execution Blinding)
 - Disables logging systems before payload execution, ensuring no forensic artifacts remain.
 - Process Injection Techniques:

- Ghostly Hollowing (via transient SEC_IMAGE sections) – No disk writes, no PE dumps.
- Direct Syscalls (No API calls, no logging).

STEGANOGRAPHY & COVERT DATA EXFILTRATION

- LSB (Least Significant Bit) Embedding
 - Hides payloads inside PNG/JPG images with custom channel selection (RGB/Alpha).
 - Dynamic Extraction: Payloads are decrypted in-memory only, leaving no forensic traces.
- Domain Fronting & Dynamic C2
 - Uses Ngrok tunneling with domain rotation to prevent IP-based blocking.
 - Supports DNS tunneling for stealthy exfiltration.

LIVING OFF THE LAND (LOTL) & PERSISTENCE

- WMI-Based C2 Beacons
 - Uses Windows Management Instrumentation for fileless persistence and command execution.
- PowerShell One-Liners (Fully Obfuscated)
 - Generates self-deleting PowerShell scripts that function as stealthy C2 agents.
- Scheduled Tasks & Registry Persistence
 - Multiple OPSEC-focused persistence mechanisms to ensure long-term access.
- Team Collaboration
 - Shared payload templates for consistent red team operations.
 - Audit logs for tracking deployments (optional, for authorized engagements only).

WHY DARK DEPLOYER PRO?

- ? Very useful for spreading, includes landing pages and fake documents to use
- ? Image exploit very effective, can upload packs of images to silently deliver payload or target send images.
- ? FUD by Default – Bypasses AV/EDR with multi-layered obfuscation and memory-only execution.
- ? Silent Drive-By Exploits – Can install payload silently just from visiting URL

USE CASES: WHERE DARK DEPLOYER PRO EXCELS

- Red Team Operations – Simulate APT-style attacks with realistic tradecraft.
- Penetration Testing – Bypass modern defences (CrowdStrike, SentinelOne, Defender ATP).
- Adversary Simulation – Mimic advanced malware (DarkCloud Stealer, Emotet-inspired droppers).
- Stealthy Data Exfiltration – Encrypted C2 channels with domain rotation & Ngrok tunneling.

TESTED AGAINST:

- Windows 10/11 (x64)
- CrowdStrike, SentinelOne, Defender ATP, Carbon Black, EDR/XDR Solutions
- VirusTotal, Hybrid Analysis, ESET, Kaspersky

Curs3d - February 7, 2026, 11:12 am

This is very interesting thanks for sharing.

ShellPower - February 7, 2026, 11:51 am

Sounds too good to be true to be honest, let's see if people will try it and survive to tell lol

WraithTools - February 7, 2026, 11:11 pm

(Feb 7, 2026 12:51 PM)ShellPower Wrote: [\[CITE\]](#) Sounds too good to be true to be honest, let's see if people will try it and survive to tell lol

What about it seems 'too good to be true'? I suppose that's a half compliment. We have clearly specified everything the tool does and explained that although one of the exploits is heavily patched, it can still be effective.

We don't make fancy sales threads, just high quality tools that work and are reasonably priced.

2 vouch copies to HQ members are available. Please post if interested.

ShellPower - February 8, 2026, 12:59 am

Was mainly referring to this:

Silent Drive-By Exploits – Can install payload silently just from visiting URL

Let's wait for them vouchers to vouch and GLWS bro

julp - February 14, 2026, 2:11 pm

Hello, can u provide live demo?

Curs3d - February 16, 2026, 1:37 pm

This is not an "Exploit kit"

dyingtofy - February 16, 2026, 10:02 pm

Happy to try out a vouch copy.

WraithTools - February 17, 2026, 1:57 am

(Feb 16, 2026 02:37 PM)Curs3d Wrote: [\[CITE\]](#) This is not an "Exploit kit"

Yes it is. BEK. It is literally a bundle of exploits. Remember you're talking to the guy who co wrote Crime Pack with mafi. It is 100% by every definition an 'Exploit Kit'

(Feb 16, 2026 11:02 PM)dyingtofy Wrote: [\[CITE\]](#) Happy to try out a vouch copy.
Sure!

DexterGO - February 18, 2026, 1:09 pm

Hello Test available ?

jason123 - February 18, 2026, 1:25 pm

This is interesting,would have been cool if you included a Demo Vid. for now GLWS

ViperPrivacy - February 19, 2026, 12:51 pm

have you a video from the pdf exploit?

DeathPenalty666 - February 19, 2026, 11:40 pm

possibility for a trial?

WraithTools - February 20, 2026, 12:39 am

1 WEEK Free Trial - \$50 added to thread as per request

Hackers - February 20, 2026, 8:37 pm

- SVG Zero-Click Exploits (CVE-2023-XXXX, fully patched but still effective in legacy systems).

Do you have any 2025- or 2026- CVEs and if so, how many? I think you probably do have a bunch of methods, but I'm wondering how realistic it is if your product description is listing 2023 CVEs but not others. I understand some may still be useful, so I'm not trying to be rude, I am just wondering.

WraithTools - February 21, 2026, 5:21 am

Yes the SVG exploit is dated, but you would be surprised how effective it still is if you have a high traffic website or a way to drive. Especially for low end 3rd world spreading. The other exploits work on any modern or legacy system. Please PM if you want to try it.

Curs3d - February 21, 2026, 6:34 am

Sure!

The guy who wrote crime pack, "Crim" Was arrested with the take down of Darknode..

WraithTools - February 21, 2026, 7:27 am

(Feb 21, 2026 07:34 AM)Curs3d Wrote: [\[CITE\]](#) The guy who wrote crime pack, "Crim" Was arrested with the take down of Darknode..

Mafi/crim. I was also part of that takedown. Crim was released with no charges as at the time there were no swedish laws that existed for the alleged charges. In fact it was mainly due to the fraudulent members of the board why we brought down.

All our tools are completely legal...

ghostbadt - February 23, 2026, 2:53 pm

where is your customer support? that name don't exist in discord tho

Warmachine.exe - February 26, 2026, 7:52 pm

Also waiting for any credible enough vouches to get posted. I am really curious but skeptical about silent drive-by exploit you have mentioned, since no real info about it is posted except "trust me bro" - at least for now. Plus true fresh and effective exploits normally would sell at least 5 times more. Will be watching this thread, got a way to monetize like a maniac right now lol, but wont risk blowing it on unproven/tested tools.

Good luck with sales ;)

P1R4T3 - February 27, 2026, 12:39 am

I would like to get the vouch copy if available.

WraithTools - February 27, 2026, 6:00 pm

It's not like we haven't tried. We do week trials of this as apposed to just giving out copies to people who just want free tools for half assed reviews.

AliasOneOneOne - March 26, 2026, 1:11 pm

I am not asking for a free tool.

I just want someone who you have given a vouch copy to, to write a review...

Also, i cannot send a private message to you.

So, since there is no review written, i doubt you have given any vouch copy?

porosss4 - March 29, 2026, 11:50 am

hello i wanna buy this. can u message me?

WraithTools - March 29, 2026, 12:22 pm

We haven't and we won't give vouch copies of this product. I've explained I do not believe in them at all, 99% of other products of people just wanting free copies to write half assed, kiss ass reviews. That's not what we're about, we sell HQ products. I will give you a free week if you tell me honestly how it works for you. I don't even want you to write a vouch. Start a contract bro for a free week.

This is only a exploit builder and data exfill or it show the clients and allow to send command? And I guess my payload must be fud or use bypass method right? Only a few exploit missing like the zombie-zip and pyzw but the price is really great. I will buy a week if my budget allow me.

WraithTools - April 1, 2026, 4:50 am

(Apr 1, 2026 04:12 AM)d3athgiver Wrote: [\[CITE\]](#) This is only a exploit builder and data exfill or it show the clients and allow to send command? it is just an exploit builder for use with your payload, updates which are free will soon include some more exploits. We also offer package deals if you are interested in our Hybrid P2P loader x47.c

yartse3 - April 11, 2026, 3:45 pm

Could you pm me your telegram?

indigo22 - April 16, 2026, 7:04 am

hello i wanna buy this. can u message me?

JRoyale - April 19, 2026, 4:39 am

Hey. I'm interested, could you pm me?

cltrade - April 19, 2026, 5:04 am

Any vouch?

GLWS

Wassime2026 - April 20, 2026, 11:05 pm

Hi i wanna buy can you send me pm your telegram?

casperr - April 21, 2026, 12:07 am

Any reviews for that ?

TEKNIX187 - May 12, 2026, 2:45 am

Hey man. This looks great
I love the UI

I have a lot of plans on testing it out. Can you send me an extensive vouch copy? Thanks and GLWS either way

briggs101 - May 17, 2026, 4:29 am

posting here to come back later, hope it still works by then.

Basik1 - June 20, 2026, 12:49 am

So, is there even one positive review? Has anyone already used this tool?

christianjohn - June 20, 2026, 12:43 pm

did it work ? , can someone who has bought this update us please

Liamhell1991 - June 23, 2026, 7:13 am

1 WEEK TRIAL LICENSE \$50 Want to try this please pm me

papikush420 - June 25, 2026, 11:34 am

A question, how did this all turn out? Can anyone confirm if it's legit?

DeathPenalty666 - June 25, 2026, 3:46 pm

Thanks, friend i appreciate the info.

caspou - June 26, 2026, 11:06 pm

Still ?

surfacepro99999 - July 6, 2026, 2:47 am

still valid? i am interested. share contact info

WraithTools - July 12, 2026, 12:12 pm

Yes, But I could not edit this thread so for V2 it has it's own sales thread now. 100% FUD and WD bypass including tamper protection

ware980 - July 18, 2026, 9:32 pm

Send me a message to buy.

Monyaks - July 19, 2026, 5:58 am

Still waiting to see someone reputable leave a vouch on this.

WraithTools - July 21, 2026, 12:19 am

(Jul 19, 2026 05:58 AM)Monyaks Wrote: [\[CITE\]](#) Still waiting to see someone reputable leave a vouch on this.

No chance of that, everyone who has applied has been useless. Also V2 is out but I needed to create a new thread: <https://hackforums.net/showthread.php?tid=6328345>
