NOTE THIS ISN'T AN EBOOK GUIDE/METHOD

IT'S ABOUT WE MAKING YOUR AI MUSIC AND YOU MONETIZE IT WHILE WORKING WITH US! YOU OWN 100% OF YOUR SONGS (We do create AI songs in every languages!)

Thread will be updated later, might missed some details, so any changes can be changed! For more questions just send a PM or reply to this thread.

Introduction

There's a ton of discussion around AI images and videos, but AI songs has recently caught lots of attention. That's where some people are quietly making real money. It's completely faceless, no identity needed, just an AI artist name and consistent releases. What most people don't realize is that many AI artists don't actually make the music themselves.

How it works:

You provide the lyrics, niche, genre and we do the rest.

The workflow is simple:

- AI artist focuses on the concept & idea.
- Music + vocals + editing are handled separately (by us)
- Finished AI song is uploaded to platforms
- The AI artist monetizes the uploads

The artist (which is YOU) controls the channel/page. The music just needs to sound finished and usable, and we will fix that for you!

Why this works:

AI songs don't need to be perfect. They need to be:

- Catchy
- On-trend
- Consistent

Most viral AI music pages aren't high-level artists. They're good at ideas and output.[/align]

Where the money comes from

AI artists upload songs to:

- YouTube
- Short-form platforms
- Streaming platforms

Monetization comes from:

- Ad revenue
- Royalties
- Brand deals
- Repeated uploads under the same theme or character

Once the page gains traction, it stacks.

I released my first AI song in Jan 9 2026 without any paid promotion just consistently uploading in Tiktok only (Its still growing). Here is the results:
