What happens if the account drops?

If the account drops, what happens to all of our projects that would be lost?

Will you pay us the estimated project value in that scenario? Because simply giving us a 2nd account won't replace the lost work from the 1st account.

Please clarify your exact policy. I am interested but will need you to offer at least \$12,000 per account ban / swap required over the course of the year.
