Thread: [Mom Found Dead in Murder-Suicide Alongside Kids Believed to Be 'Willing Participant'](#)

The Pact - February 9, 2026, 7:55 pm

Duong's father, who had seen the family prior to their death, told police Nguyen and Duong would "amp each other up" and that Duong would "feed her the fear" about the danger to their lives.

A mom in Canada who was killed alongside her two kids is believed to have been a "willing participant," in the murder/suicide according to authorities.---I'm surprised news outlets are reporting it like this everywhere because I don't see any proof of this?

The family members were all found dead in the same bed and the boys each had teddy bears at their feet.

A year before his death, Duong suffered a traumatic brain injury, the outlet reported.

Duong's longtime family doctor testified that in a psychiatric assessment at the hospital prior to release, Duong was "very friendly and calm and co-operative" and he saw no reason to be concerned about his mental state.
