Complete Crypto Casino Platform's for Sale

I'm offering a complete crypto casino platform for serious operators, affiliates, or teams that want a production-grade foundation without spending months building core infrastructure.

This is licensed code. This is a product offering, meaning it is not exclusive to one buyer (i.e., licensing is not limited to a single purchaser unless explicitly agreed as a separate, bespoke exclusivity deal).

Pricing starting at 299\$

Base License (Included)

Frontend (Included)

- Full casino frontend included in the base license
- White-label branding options (logo/colors/domain) depending on package

Original Games (Included)

Several original games are included in the base license (package details shared on request). Typical scope: provably-fair ready originals (e.g. Crash-style).

Core Platform (Included)

- Accounts / auth flows
- Admin/backoffice essentials
- Operational controls (roles/permissions, configurable limits)
- Crypto payment flows (asset support depends on your setup)

Add-ons (Extra)

These are not included in the base license and are priced separately:

? Slots

- Slots provider integration
- Provider tooling + operational controls (backoffice capabilities depend on provider)

? Sportsbook

- Sportsbook integration (provider-based)
- Related operational tooling & reporting

? Other additions

- Affiliates, additional game packs, multi-provider setups, custom UI/UX, localized flows, etc.

Provider Network / Commercial Advantages

We maintain strong relationships with multiple providers, covering a wide range of offerings,

including:

- Large slot catalogs (extensive libraries)
- Provider backoffice tooling and operational controls
- Configuration options where permitted by provider terms and applicable regulation (availability varies by provider/jurisdiction)

In addition, buyers working through us can often access friendly API commercial terms (more favorable pricing compared to going in cold), depending on provider, volume expectations, and target market.

Delivery Options

Option A — White-label

- Your personal branded build + deployment guidance
- Operator walkthrough

Option B — Custom expansion

- Start from the base platform and extend with add-ons or custom modules

Contact for Demo

Reply/DM to get:

- Demo access
 - Package breakdown (base vs add-ons)

Yes i will, but there is some functions that has to me removed, as i take security extremely serious when it comes to handling this kind of value for other people. Let me provide some pictures very soon.

Also, every potential customer will get access to a working casino to try.
