Thread: [Best Google Ads cloaker for 2026?](#)

**DigitalWorker** - February 10, 2026, 11:30 pm

Hi,

I am looking for a good Google Ads cloaker that works in 2026. Google's new AI detection is very strong now and my ads are getting banned quickly.

I need a tool that:

- 1.Can hide my real page from Google bots.
- 2.Updates its bot list every day.
- 3.Works fast so the user doesn't see a delay.

What is the best tool everyone is using for Google Ads right now? I need something stable for high-spend accounts.

Thanks.

Same here bro, I'm also looking for a tool like that. If you find a good one, let me know.

I was using <https://cloakit.pro/>

Seemed quite good but havent used for a while also quickly cost effective

Hi DigitalWorker,

I was facing some issues while running Google Ads for my campaigns. CPC was high and conversions were low. Someone on the forum suggested I try Trustcloaker, so I decided to give it a try.

I have been using it for some time now, and honestly, I found its features quite useful. It's also affordable, and it helped me solve my problems to a good extent.

If you want, you can try it too, but just sharing my personal experience here. It worked for me, but you can see if it fits your setup.

All cloaking tools similiary wrok . I used JCI before. In the beginning, the results were good, but after some time my ads account started getting suspended. Then I started using TrafficGuardian. This tool worked well for my campaigns. One thing to note is that when you buy the subscription, the plan does not activate immediately. Sometimes you may need to wait about 3 to 4 hours for activation but fine .

Google now uses a mix of automated scanning, human reviews, and behavioral signals to detect mismatches between what bots see and what users see, so even tools that “work temporarily” tend to get flagged sooner or later
