Mozilla Adds One-Click Option to Disable Generative AI Features in Firefox

Mozilla on Monday announced a new controls section in its Firefox desktop browser settings that allows users to completely turn off generative artificial intelligence (GenAI) features.

"It provides a single place to block current and future generative AI features in Firefox," Ajit Varma, head of Firefox, said. "You can also review and manage individual AI features if you choose to use them. This

Nice to see mozilla giving people a simple off switch. Not everyone wants AI baked into their browser, esp considering its being implemented into everything nowadays

shakur123 - February 22, 2026, 6:37 pm

Totally agree. Giving users a clear opt-out is the right move AI should be a choice, not the default.
