Delegation Is the Real Prompt Engineering: How to Get Better Results From AI

Better AI results come from better delegation. Learn three rules—clear instruction, no micromanaging, and managing “known unknowns”—plus a prompt checklist.

Strong take. Most people blame the model when the real issue is vague delegation.

Clear outcomes, defined constraints, and awareness of “known unknowns” make a bigger difference than fancy prompt tricks. AI works best when you think like a manager — set direction, don’t micromanage, and review the output strategically.
