Beautiful contest and I have just the right poem for this.

I wrote this poem last year and it's titled;

On A Girl ?

I first saw you so beautiful in pictures.
Even lovelier than imagination's fairest form.

What words could capture your sighing lips, O beloved?
Each time I looked, I saw only beauty.

Indeed, these very eyes have done great injustice.
I've seen the whole world imprisoned in this dewdrop.

Desires gasp, unfulfilled, never quenched.
In how many forms have I not seen burning gunpowder?

Even trembling images drenched in tears.
The last time I saw them, I saw everything.

This is an original poem from me for my wife. I'm not a poetic person... but I tried hahaha. Please don't laugh at these not-so-great lines. At least I made the effort.

Hey you, who are always there...
Me, the one who always disappoints you...
Oh you, who are always patient...
And I'm sorry I still haven't been able to give you what you hoped for...
You are like a bright star when I am in the darkness...
You are like a gentle breeze when I am exhausted...
On this Valentine's Day, I offer only my sincere love and some chocolate as a sign of how deeply I love you... my wife ?

Pink army help quick love this hahaha..

Under the moonlit sky, we glanced into each-other's horizons,
But the shine we forgot at night we found by daylight,
In the aetheral dreams, kindled with the passion of our forgotten despair,
We reached the stars, moon and more.

Alas, not everything is meant to be,

as the forces of evil convene, darkness extends tendrils in the dusk glow,
we stand face-to-face, enveloped in the shades of forgotten love
and possibilities.

Felt romantic, didn't even have to use A.I ~ tho might just be a Haiku artform.

I tried to bruteforce my way into your grace,
but you had 2FA on your beautiful face.
I sent phishing mail, hoping you'd click,
but you filtered my spam and the connection may not stick.

My pulse is a ping with a high latency lag,
while I'm hunting for bugs and a Quick Love flag.
I'd SQL inject a yes to your soul,
to bypass your firewall and take full control.

I don't need a botnet with a lot of power..
Just take a seat with me in HF lounge for a romantic hour.
So let's peer to peer and encrypt our connection,
I've found no exploits in your perfect perfection.

I'll give you my private key baby, if it's true,
but don't steal all my crypto acting like I don't know you.
I'm catching feels like a 0-day flaw,
Omni is the coolest admin that I ever saw.

If you stick around on site, let's get to know each other.
I'd upgrade your account to L33T or UB3R,
then take you to dinner (I'll pay for the Uber).
