? Complete Crypto Casino Platform for Sale

Production-Ready. Licensed Code. Built for Serious Operators.

I'm offering a complete crypto casino platform for operators, affiliates, or teams who want a production-grade foundation without spending months building infrastructure from scratch.

This is licensed code — a structured product offering.

It is not exclusive to a single buyer unless a separate bespoke exclusivity agreement is negotiated.

Starting from \$299

? Base License (Included)

? Frontend (Included)

Full casino frontend

Clean, modern UI

White-label branding (logo / colors / domain depending on package)

? Original Games (Included)

Several proprietary original games are included.

Typical scope:

Provably-fair ready originals

Crash-style and related high-engagement formats

Designed to be extensible

? Core Platform (Included)

User accounts & authentication flows

Admin / backoffice essentials

Role-based permissions

Operational limits & controls

Crypto payment integrations

(Supported assets depend on your setup)

Built to serve as a scalable operator foundation.

? Add-Ons (Optional / Priced Separately)

? Slots Integration

Slots provider integration

Large catalog support

Provider tooling + operational controls  
(Backoffice scope depends on provider)

? Sportsbook

Full sportsbook provider integration

Reporting & operational tools

API-based scalable setup

? Additional Expansions

Affiliate system

Multi-provider setup

Additional game packs

Custom UI/UX modifications

Localization flows

Jurisdiction-based configuration support

? Provider Network & Commercial Advantages

We maintain strong working relationships with multiple providers covering:

Extensive slot libraries

Backoffice tooling

Operational control layers

Configuration options (where permitted under provider terms & regulation)

Buyers working through us can often access:

Favorable API commercial terms

Reduced onboarding friction

Better pricing structures vs direct cold approach

(Terms depend on provider, volume expectations, and target market.)

? Delivery Options

Option A — White-Label Deployment

Personal branded build

Deployment guidance

Operator walkthrough

Option B — Custom Expansion

Start from the base platform

Extend with add-ons or bespoke modules

? Who This Is For

Operators entering crypto gaming

Affiliate networks expanding vertically

Teams that want to skip core infrastructure build time

Investors looking for a deployable product

? Contact for Demo

Reply or DM to receive:

Demo access

Detailed package breakdown (Base vs Add-ons)

Commercial discussion

Serious inquiries only.

Few samples from the most simple solution.
