Thread: [How do I bypass Defender for my .exe file?](#)

methcelik22 - February 21, 2026, 9:49 am

Hello. How can I encrypt and obfuscate my .exe build? Are there any applications that can help with this? For Windows 11, bypassing Windows Defender and Chrome Defender is sufficient for me.?

DramaKing - February 21, 2026, 9:55 am

You drop your file, WD quarantines it, then you restore and run it. I can sell you a downloader to do this for \$20.

Of course, \$20 is fine for me, but it's not that great. It detects VT 0 and stuff, but there's no need for that. If there's a free app that helps, that's fine too.

Are you saying that you get 0 detections on VirusTotal?

methcelik22 - February 21, 2026, 10:29 am

No, there's no need to do that. It only detects 70 to 50. Just bypass WD and bypass Chrome Defender.

Playing with windows defender settings mostly likely will flag your file instantly.
