Thread: [\[WTS\] How To Elite Computer Hacking](#)

charlesanthony - February 21, 2026, 10:23 pm

Ever wonder how to find your own 0days?

Ever wonder how a security researcher handles bug bounties and earns a living doing this?

Ever wonder how the real computer hackers hack Facebook, LinkedIn, InstaGram, Gmail, Amazon, Discord, etc Servers?

Ever wonder how to root?

Ever wonder how to bypass or adapt to the newest security?

Fuzz ready critical vulnerability finding script included Senior Offensive Security package. Earn from \$5k to \$10k/monthly and up to \$100k+ per bug bounty potentially. Bug bounties are ACCEPTING my methodology. ? The potential is there to make a living from this. This package does NOT include Windows exploit development. You aren't just taught the capacity to find one vulnerability but 10's if not 100's or more critical memory corruption vulnerabilities which can quite add up!

Requirements: Intermediate to Advanced Python Programmer

I teach you directly. 1200 line script + 40 page ebook.

This material is not found anywhere on the internet. Most colleges or universities attempt to teach this material but fail to grasp the concept of what offensive security really is about.

Learn how the professionals do it. This is for educational purposes only. This is a tester before our school launches. Testing the waters.

Limited Time Offer: \$50,000

Only \$50,000? That must be too good to be true? Most expensive ebook I ever seen sold here.

charlesanthony - February 21, 2026, 10:44 pm

Yes. It's probably best if I wait to sell it on our website. It's going to be launched soon. It's the real deal, though. How to root and adapt to the latest security and technology stacks.

DramaKing - February 22, 2026, 2:03 am

1. No one is going to take a chance on this even if this 40-page eBook is superior to a college degree, and they somehow come up with that small fortune.

2. You just doxxed yourself.

IRLCash - February 22, 2026, 9:46 am

You might want to edit your post and remove your LinkedIn for OPSec reasons.
