Thread: [Buying: Traffic/Spreading Methods/CPanels/FTPs/Websites w/ traffic \[H\] BTC](#)

Blessed Alien Warrior - February 22, 2026, 11:09 am

I'm looking for traffic.

Fake cloudflare malware page.

Also targets mobile devices. So PC/mobile traffic needed.

Any method [H] BTC

Let me know what it is you got and I'll value it if I use it between 10 and 100 \$. Or more for high traffic products.

Regards! ?

Hey, I've got just the thing for you. I'm talking about a malicious Cloudflare page that's designed to infect both PC and mobile devices with malware. It's got a steady stream of traffic coming through, and I can provide you with both desktop and mobile hits.

pm if you still interested

Lol I'm using exactly this (Win+R) -- I also have a way to target mobile devices. But what you got? Let me know! Perhaps we could improve each others pages. HMU!

You use Win+R for PC, how on earth is it easy to infect mobile devices without using a zero-day? Smartphones does even allow installation from unknown sources by default. So did you get to circumvent this?

i have some custom written python scripts/scanners and uploaders for specific methods. guaranteed to get bots/shells every day.

send me a message.
