Thread: [Why this site so strict with limitations? and my introduction to greet the community](#)

philk98preservationist - February 23, 2026, 10:24 pm

Hi everyone Im Phil but you can call me K98 the archiver if you want!

I don't understand about this. I can't edit my profile, I can't change my avatar, or even post links to video or sites I am referring to!

What kind of forum is this? I also don't appreciate the warning noticed I got for asking a question about accessing a pc through social media isn't that this site's about? ?

you guys are betraying the site's title here which made no sense to me unless this site was run by cyber security freaks? Just guessing lmao. ?

Maybe Im barking in the wrong tree. I have to be honest that I am not seeking illegal criminal activity around here. I am just seeking assistance with someone who is more experienced and knowledgeable than me with computers. ?

I don't know anything about hacking or how coding works and I do not have the time or the patience to go through schooling myself here as Im only here to find a friend or at least a expert who can help me out. I am only trying to save people's files in order to archive them and only for lost media. ?

Lost media as in content thats never been available to the general public for a very long time but I know their stuff is out there being unfairly hoarded because there a lot of cruel selfish people in the world who don't give a damn shit about losing their work that we care more than the project makers think! I am only thinking about Minon here because his work is highly valuable to me as a big fan of Kirby since thats my childhood from the 90s! ?

I am trying to recover as much things I can from Cosmic Chaos and the only way to get the rest of the missing stuff I am unable to reach is to find someone who can access Minon's pc in order to copy and paste their assets (sorry I don't know Minon's gender seem to be kept private) safely without accidentally deleting their original files and WE DO NOT want that to happen lmao. ?

I want Minon's 3d models, textures, and other assets to be saved from being lost media forever. Hope you guys will understand and please feel free to message me if you can help! ?

There are quite a lot of paywalled features. You can't post links yet for safety and antispam reasons. For a time non-upgraded members could not even post. I'm rather surprised that a clearweb site such as this has relaxed the rules and allowed more blackhat topics.

I couldn't imagine what you are referring to.

If you don't like the limited rules on discussions, there are underground forums where you can post about all the illegal stuff you want.
