Safe and Inclusive E-Society: How Lithuania Is Bracing for AI-Driven Cyber Fraud

Technologies are evolving fast, reshaping economies, governance, and daily life. Yet, as innovation accelerates, so do digital risks. Technological change is no longer abstract for such a country as Lithuania, as well. From e-signatures to digital health records, the country depends on secure systems.

Cybersecurity has become not only a technical challenge but a societal one – demanding

It's good to see them taking this seriously, because ai scams are becoming more prevalent and regular people typically feel it first.

shakur123 - February 25, 2026, 1:08 pm

Tech moving fast is one thing but when your e-health records, e-signatures, and everything else are on the line, cybersecurity stops being nerd talk and becomes "please don't leak my bank info" panic.
