Thread: [Youtube Seo Guide](#)

Timma56 - February 25, 2026, 12:42 pm

I have recently started a YouTube channel. Can someone please guide me on how I can do SEO and optimization for my videos?

Are there any free tools available for this, or any proper method I can follow?

I would really appreciate it if someone could guide me, as I am completely new to this.

Use TubeBuddy extension. It's free.

What is your channel about? I can give you some quick tips.

Bot the views using a traffic exchange site like YTMonster!

IRLCash - February 27, 2026, 1:07 pm

You need to give YouTube what they want so likes/comments/shares(backlinks) & views and if you do that consistently it kinda tricks their algo to rank you higher.

Olivia Martinez - April 5, 2026, 10:26 pm

YouTube SEO, it is important to post your videos consistently. You should research and use proper keywords in your titles and descriptions, and maintain consistency.
