hi! i am maybe interested but i noticed a few discrepancies maybe you can answer for me before i purchase?

1. I noticed your join date is 4 days ago with 0 credibility, 0 popularity, and only 6 posts with 2 threads and you are already a vendor? Does this verify your product to be legitimate on hf? I am fairly new to the forum but am not sure how that all works.

2. another user vouched but apparently it doesn't count. Are they a user from ur website or did they buy from u on hackforums? someone mentioned the contract system so i wanna know if u are properly using that and if i purchase from u if we can use a contract as well

thx :D

DramaKing - February 25, 2026, 8:13 pm

A "legitimate" service like this is very hard to come by. You have something quite unique here.

You're right we're new here. We've had a few customers who came from HF, but as you mentioned, that apparently doesn't count since it's done without the contract. So, like you, I'm simply trying to follow the rules and we do contract.

As stated in my post, we offer a free test so users can try the service before making a purchase.

Ok thank you Stanley

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Use the contract system. Or the risk is your own!

Sure, we always ask customers to make deals only through contracts but must of customers are too lazy to do that.

It's obvious you have no idea how sms works and we did help you even though you weren't a customer and no you didn't pay and you don't paid for anything. If you don't want to learn then don't use my service. you could use AI to know which country require pre registration and which country have open SID that's public information and anyone with little knowledge can google it.

This with just search on google "list country sms open sid" and found this

<https://intergo.freshdesk.com/support/solutions/articles/43000562659-international-sms-sender-id-regulations-and-requirements-list-of-countries->

The crazy part is that you are just time waster and think you have the right that we should help you and give you our time.
