how would this work?

so i found a way to download members videos from other sights that arent registered on OnlyFans then basicaly poirate said content and pictures to a fake profile that you set up authenticate yourself and click become a creator on the sight i set you up a fake email passwords send it to you with the pack or if you want to set it up yourself i will help you or i can send a link to your new account via email but once you become a creator you upload 1 vid a day i can find between 25 and 75 of the same creator and make sure you put them as membership only set your price and let the \$\$\$ roll in bro but it might take 2-3 hrs for me to do fully then u gotta wait for subs n shit but youll make between \$50 and \$3.5k a month roughly with bare minimum of 50 subs cause your not letting them watch 4 free right all i can say is if you do it keep it low key
