Thread: [\[FUD\] Private Dropper / Crypter 2/72 VT Defender Clean \\$10 Build Feb 2026](#)

pip32 - February 27, 2026, 1:01 am

Hello everyone,

Selling a fresh private dropper (loader + binder + heavy obfuscator) with very solid evasion results as of February 27, 2026.

? Current test results (screenshots attached below):

- VirusTotal: 2/72 detections
 - > only Elastic flagged as Trapmine (high confidence), all other 70 vendors undetected
 - > Scan date: 27.02.2026 | File size: ~791 KB
- Windows Defender (real-time + cloud protection, Windows 11 24H2/25H2): 0 threats detected
 - > Full quick scan passed clean

Features included for \$10:

- Build size: 50 KB – 1.5 MB (very flexible depending on payload & settings)
- Every single build is unique (full randomization of structure, keys, strings, junk code)
- Strong encryption & obfuscation: XOR + AES-256 + multiple advanced AV-evasion layers
- Complete metadata customization (CompanyName, ProductName, Description, Version, LegalCopyright, etc.)
- Custom icon support (upload your own or choose from stock)
- Free EXE binder — merge your additional EXE files only (no DLL/PDF/etc.)
- Supported output formats: standalone EXE, reflective DLL, shellcode injection

Price:

\$10 USDT — one fully custom build

Bonuses & guarantees:

- Free test sample 0/5
- If detections jump >10/72 in the first 24 hours -> replacement build free
