Thread: [Gmail.com Inbox SPOOF Mailer with DMARC Bypass](#)

saas - February 27, 2026, 6:58 pm

I sell a soft mailer with the help of it you can easily achieve a successful entry into inbox specifically for mail. gmail.com

Substitution occurs using the Punycode simulation method.

Blockchain.com | Bybit.com | Binance.com | Kraken.com | Starknet.io | Robinhood.com |
OneDrive.com | Tesla.com
and much other crypto companies / government banks !

See examples below:

There are no restrictions on the desired number of emails sent.

There are some minor consumables and the frequency of their updating depends on the desired volumes.

At the moment the solution has only a technical form (launching and connecting via a script), but it is always possible to implement flexible work through the mailer api – it all depends on the required work scenario,
for an additional fee I can connect a trusted coder for the desired implementation.

As part of the deal I will provide tests for the necessary emails!
I work through the guarantor of this forum.

First contact via PM!

Current price:

0.12 BTC (I have a first sold for 0.1 btc on the neighbor paid forum already)

Sticky Bot - February 28, 2026, 6:16 am

Hi, I'm Sticky Bot. The owner of this thread has purchased a Paid Sticky. Hack Forums does not get involved in deals or deal disputes. We do not vouch for the product or the service offered by members. Please note that all deals are at your own risk. The sticky will expire on Mar 14, 2026. If you or a loved one are interested in buying a sticky please visit this page: [Buy Sticky](#). For more information about Paid Stickies you can read our [Help Doc](#).

jason123 - March 1, 2026, 10:10 am

Nice to read this but price stated seem high, can you review?

Send me a PM with the details of your request and budget. We maybe able to negotiate an individual deal!

Shapeless - March 9, 2026, 11:33 am

Beware. This is nice but this is not what he claims its not binance.com as sender

Binance and one shown in your screenshot looks different. ?

ware980 - July 21, 2026, 3:11 pm

Hi, I need a test.

PM pls

The Joker - July 21, 2026, 10:06 pm

\$8000 seems steep but that's just my opinion. I have very limited need. I would probably send like 5-10 emails a day. Do you offer per email pricing.?

saas - August 25, 2026, 10:04 pm

I decided to remember this place is anyone else interested? Price is negotiable

What the fuck are you talking mate?

The spoof mailer still working.

My current price is 0.06 btc on neighbor forum.

DramaKing - October 20, 2026, 6:15 am

So you can just bypass DMARC policies on any random domain? If SPF fails, won't that still apply?
