Chasing Dreams (Taking Big Risks)

To me chasing dreams involves pursuing passions, ambitions, or goals even when the outcome is uncertain. This could mean starting a business, switching careers, relocating to a new place, or following a creative or unconventional path.

Playing it safe means choosing a path with predictable income, structure, and security. This might include keeping a stable job, avoiding major risks, or prioritizing responsibilities over personal ambitions. which one are you ?

For me i love taking well calculated risk

I've been chasing the dream. The safe path never attracted me much.

Yea no, I tried that. Got hurt, never trust women or "friends" ever again. Now I just go with the flow, take it easy and safe even tho I know I wont make much money, but it is safe bet to just work this job that I know so well.

I have a lot of big dreams, but I won't try to achieve them until I get rich or if I get rich.

But if I do ill go achieve my dreams.
