Thread: [JINX C2 | Native C++ Loader | \\$10 OFFER!| Cheapest boom you'll ever buy. BOOM!](#)

NotJinx - February 28, 2026, 4:07 pm

? THE AGENT (Operational Power)

The Jinx Agent is a highly optimized engine capable of deep system interaction and advanced post-exploitation.

? RECON & SURVEILLANCE

- Visual Capture: High-speed screenshots with motion-detection.
- Continuous Recording: Background frame-by-frame monitoring.
- Live OCR: Extract text from screen or files in real-time.
- Extended Keylogging: Window-aware logging with timestamps.
- File Management: Remote download, upload, and file manipulation.

? CREDENTIAL & IDENTITY THEFT

- Vault Recovery: Dump passwords from all Chromium-based browsers.
- Wireless Recon: Extract all saved WiFi profiles and cleartext keys.
- Identity Masking: Steal and duplicate tokens from Admin/System processes.
- Memory Forensics: Remote LSASS minidumping for offline analysis.

? INFILTRATION & EVASION

- Advanced Injection: Shellcode, APC, and Reflective DLL methods.
- Ghost Execution: Process Doppelg nging and PPID spoofing.
- Deep Anti-Analysis: VM, Sandbox, and Debugger detection (Skew checks).
- Anti-Forensics: Clear Event Logs, Prefetch, and Timestomping.
- Telemetry Kill: In-memory patching of AMSI and ETW.

? NETWORK & LATERAL MOVEMENT

- Stealth Exfiltration: Data via HTTPS chunks, DNS queries, or ICMP.
- Pivoting: Integrated SOCKS5 Proxy and internal Port Scanner.
- Lateral Exec: Pass-the-Hash, WMI, and SMB service creation.

MadScientist - February 28, 2026, 6:27 pm

Looks interesting, look forward to hearing peoples feedback on the project! If you need a tester I'd be interested to mess about with it but testing would be limited to my own VMs not large scale.

Regardless G/L with the project bro

DramaKing - March 1, 2026, 5:13 am

I'm about to start testing some loaders. Yours does sound good.

Looks like the new kleenscan domain was removed.

Looks like the new kleenscan domain was removed.

Black92 - March 2, 2026, 2:10 pm

I'd like to test

PM sent

DeathPenalty666 - March 2, 2026, 6:45 pm

If your tool is of the same quality as your post you won't need luck in the market !!! Its clean, simple and promising!!

But something feel wrong in the builder/server gui... We should see his eyes or his face, not his neck haha it make this weird. Otherwise this is great.

What are your plan for the future with it? You have any plan to reach other OS? Can we ask custum features or edit?

Honestly It's hard to give a price only on image. 10\$ minimum at least you did a great job over

here ans maybe 25 if it work flawlessly.

Affordable loader are rare. As long as you feel happy with the price you got this is all matter man!!!
Good luck with your business :)

Black92 - *March 3, 2026, 12:25 am*

I've tested it and to be honest UI is definitely not good for eyes, and it's screaming AI.
When it comes to functionality, it does have some functions but it's extremely minimalistic.

h4x0rweed - *March 3, 2026, 12:57 am*

Hello! I'd like to purchase a trial to familiarize myself with the interface and its features. I'm interested.

OpalCanidae - *March 3, 2026, 2:35 am*

I've been around and I love testing out malware.
The UI looks somewhat nice which has become a rarity

Regardless good luck to anyone who wants to or is able to test, and good luck to OP on future sales and such.

gongbongdave87 - *March 6, 2026, 12:15 pm*

please sent me more info

BlackxWaterUSA - *March 7, 2026, 1:54 pm*

I have some questions about this, would deff love to test tho. send me a pm.

Comrade - *March 8, 2026, 12:58 am*

? Glamour C2 — The Next Generation Update ?

Refined. Powerful. Undetectable.

We've taken Glamour to the next level. This update focuses on expanding the agent's capabilities from a simple bot to a full-scale post-exploitation powerhouse.

--- WHAT'S NEW? ---

? Builder v2.0

▢ UI Polish: General readability improvements and proper font rendering.

▢ Stability: Fixed a critical crash on startup. Build your stubs with confidence.

? Agent Evolution (20 -> 60+ Commands)

▢ Stealer Module: New high-performance credential stealing (Browsers, WiFi, Discord Tokens).

▢ Interactive Access: Real-time Remote Shell directly from the panel.

▢ Persistence: 5+ new methods added to stay on the target across reboots.

▢ Evasion: Advanced Anti-Analysis & VM Detection to bypass sandboxes.

▢ Hijacking: Real-time Clipboard Hijacker for crypto/data manipulation.

▢ Exfiltration: Added support for DNS, ICMP, and HTTPS protocols.

[*] Injection: Several new process injection techniques for stealthy execution.

? Server & Panel Upgrades

▢ New Command Tabs: Dedicated sections for Network Tools and SOCKS5 Proxy.

▢ Terminal UI: Fully interactive shell tab — type commands directly in your browser.

[*] Expanded Menu: Organized layout to handle the new massive command set.

Quote>Note: The agent has been massively expanded. We've moved from basic tasking to a full suite.

Whether you need stealthy exfiltration or loud post-ex tools, Glamour has you covered.

? GLAMOUR C2 LOADER - The Diva of Botnets ?

I've been developing this native C++ loader and I'm looking for some feedback and pricing advice. It's designed to be fast, sexy, and lethal.

Current Features: Native C++ Agent: Tiny footprint, no dependencies.

RunPE Engine: Execute PE files directly in RAM. No files dropped to disk. Glamour Nexus Panel: Full web control (Port 80/custom).

Stealth & Veil: Hidden process, WD Exclusions, and Persistence. Remote Shell: CMD/PowerShell output returned to panel.

Update/Uninstall: One-click management for your shadows.

Questions for the community:

1. How much would you pay for a Lifetime? I was thinking small (\$5-\$15) but maybe it's worth more?
2. What features should I add next? (Planning on UAC Bypass and Anti-VM).
3. Looking for 2-3 reputable members for vouch copies soon.

? GLAMOUR C2 - OPEN TESTING PHASE ?

Status: 0/10 Copies Claimed

? HOW TO CLAIM YOUR COPY:

☐ Post a comment below expressing your interest.

☐ I will PM you the Build + Panel access.

Run your tests (RunPE, persistence, etc.).

? THE "DIVA" FEEDBACK FORM:

After testing, please reply with:

Code Fair Lifetime Price? (Currently thinking \$15, is it too low?)

Missing Features: (What would make you buy this instantly?)

Ready to make your targets look glamorous?

You didn't specify an amount in the contract; if you want a license, it's \$10.

Alvarezvin - April 5, 2026, 2:29 am

Doing that now, do you accept perfect money

martigo333 - April 5, 2026, 9:41 am

Checking to come back later...

Alvarezvin - April 5, 2026, 6:13 pm

I just want to vouch for this product ?

Not only is the quality top-notch, but the seller support is honestly one of the best I've experienced.
I minor issue with setup, and their seller responded quickly, professionally, and made sure everything was sorted without stress.

It's rare to find a product with low price that actually cares about customers after purchase, but he really delivered.

Highly recommend if you value both quality and reliable support .

NotJinx - April 5, 2026, 6:51 pm

All versions of the loader are available for download. If a version is updated and has a bug, you can always continue using the previous version, which will still work. If you encounter any errors, please let me know and I'll fix them.

Ports - April 24, 2026, 3:52 pm

Just purchased this loader and I love it! The UI looks great, easy to setup, and most importantly, it just works! For 15 lifetime, it really is a steal. 10/10 loader, 10/10 support, 10/10 experience. ?

DeathPenalty666 - June 1, 2026, 9:09 pm

Burk horrible botnet..... I'm kidding totally for 10\$ this is a SOLIDE blast to pick and i regret not having buy it 5\$ more. Regular upsdte come out, Stability is now decent, virus total report for a tool NOT CRYPTED is way over the human reality of what most seller do!!!! I paid more for keylogger that just vever worked, was detected and suck a waste of itme going into a dispute would make it even worst.

You dont like something? You have a problem? You would like to have something added?? G
O !!!!!!!!!!! Don't be shy and move foward, the next day you may see your problem or wish already added ;) . This things without crypting is so easy to spread, only a brain with some originality and you are started. I made some python pbfiscated tool, Silent exploit and various format obfuscator and so far only one people busted it and it was because i named it YoucannotCatchMe.exe and a second one Trytow.exe so i expected to be catch haha. I made a test and asked a fdriend to test it, took 3h removing it with basic method to reload and restart it so with good tool this is killer. Keep working on it princess you rock :)? loading encrypted image...

nope

The jinx in the article was by Rendzna or whatever his name was.
The first sentence description (Go-based) vs the description on this thread (C++) confirms this quickly.

Rendzna is doxxed publicly as well. You can find repacks of his SRC he released/sold through other third party vendors--but it is now impossible to crypt
