Thread: [Favorite Movies/Shows/Podcasts of 2025-2026 lately?](#)

Looking for new stuff to throw on in the background, what're your favorite movies, shows, or podcasts as of late - any genre really.

Been listening to Brook and Jubal - hilarious crazy date stories trying to contact someone who ghosts them and find out why or awkward tuesday calls of ppl getting advice then making hilariously awkward phone calls on air - Mr Robot again - True Crime Docs like Fern and Darknet Diaries + Modern Mischief + Hak5 on YT, etc but really want new content to throw on!

Damn, unfortunately most of the content I consume is in Spanish. But I also listen to some videos from Business Insider, a YouTube channel entirely in English that makes short reports about a variety of topics—food, social issues, culture, politics, and economics.

Sometimes I play the video two or three times just to try to train my English listening comprehension a bit hehe.
