telegram danielperezzzz6 apk crypting for 3\$ per crypt

blackhatrabbitt - May 25, 2026, 10:17 am

Can i get the current contact of the person who make crypt for my apk? thx

CyberneticsX - June 15, 2026, 12:44 am

There are very few on telegram. I also offer apk crypting if you still require.

Crypting apk's on Android is more like scantime crypting for Windows executables with limited success rate. I am not aware of any successful apk crypters unfortunately. :-(

I use a good one myself with zero prompting for unknown app warning by play protect, and the dropper and loader is one of a kind.

The whole idea of crypting APKs is meaningless since the mobile framework is so fundamentally different from desktop. Doesn't stop the APK crypter scammers from wearing out their tryhard pants and use fancy tech lingo to fool the gullible bastards. May the devil take the APK crypter crooks.

Bah!
