Thread: [The Next Meme Coin To 10x?](#)

IRLCash - March 2, 2026, 11:48 am

Some of these meme coins go crazy, does anyone see any with big potential for like 10X gains?

I know some of you are going to say "STFU, buy BTC & hold."

I get that. That's good advice for most people.

I prefer to live dangerously though like Austin powers. ?

Omniscient - March 2, 2026, 12:29 pm

I'll be curious to see who comes up with a crypto for you and which one it is.

lordshisho - March 2, 2026, 12:36 pm

Hyperliquid at \$300 is an easy 10x.

Don't fade the most pristine asset of our modern generation: HYPE.

Why is Hyperliquid going to remain #1 in their vertical with so many bigger players coming for their lunch?

Which other players do you think would compete?

SUI-3183372 - March 2, 2026, 8:06 pm

Aster primarily, but seems like a new major player emerges in the perps scene every 12 months or so.

Hyperliquid is absolutely outrunning all major competitors in both features and product. Teams like Trade.xyz (Unit) are slowly but surely deploying 24/7 tradfi markets via HIP-3 with deep liquidity. Products like Aster and Lighter have seen down only since TGE and have not been nearly as useful as Hyperliquid.

Hyperliquid is infrastructure for decentralized financial markets. It's not just a perp dex.

There is no second Hyperliquid.

Aster vs HyperLiquid

Just by branding names only, I'd go with HyperLiquid. Sometimes names are everything because it's the first aesthetic a newb like me will see.
