Thread: [\[DOWNLOAD\] - Cain & Abel - OLD SCHOOL - Packet Sniffer/Analyzer](#)

C00Lssh - March 2, 2026, 10:12 pm

Some of you guys may have remembered this tool.....

https://techblazing.com/cain-abel-alternatives-modern-tools-for-network-security-analysis/?fi=0&cid=3c4ac6a6-e084-40ba-8d49-57498b22786e&sub=oxid.it&utm_source=oxid.it&hide_featured=1

This brought me back when the download came across and i was able to get it to work....

Shoot me a message if you need help! - Wanted to share!

I haven't seen Cain & Abel mentioned in a long time. Does it require older drivers like WinPcap to function properly? Curious if it still runs stable on newer hardware.

i cant wait to play this gamee

DramaKing - March 3, 2026, 12:37 am

Glad you were able to get it to work.

CrusadersX - March 3, 2026, 4:13 am

Cain & Able is what I used back then to pull up addresses. I wonder what's the new best ip pullers now

nothing better than being in middle school, coming across cain & abel, and becoming a internet/xbox king that no one messed with. Feeling like a 3lit3 h@x0r everytime you clicked the

poison button xD

FatalMessiahIsGod777 - March 8, 2026, 9:40 am

i use to use this all the time and had alot of fun doing so its a shame its depleted and no one has made a more updated version for 2026 hopfully one day someone does restore it it would be good to see :)

Takes me back to halo 2 on an Xbox. Team standbying with Zone Alarm. Forcing host. Later on getting a shell booter.

MadScientist - March 8, 2026, 10:21 am

Ahh good ol days of easy SSLStriping combined with Ettercap and dsniff suite/driftnet. Man I miss WEP and the easy days of skating around town cracking WEP keys and MITMing xD Found out my old apartment manager was cheating on his wife with 'young gay prostitutes' lol and getting full access to Barracuda securities employee next door to me's VPN->VPS network decades ago

all of these people messaging me for this, you can download right here in the thread. please READ

MauiHacker - March 11, 2026, 9:36 pm

i dont have enough bytes yet, but i am saving up for this.

C00Lssh - March 15, 2026, 1:41 am

Great tool! if anyone needs help getting it to run with modern architecture, just ping ~ :D

WingRust - March 15, 2026, 9:33 am

Thanks for posting even seeing the name brings back memories and not the PTSD type for a change :D, I think I've still got a copy of this on a floppy in my loft along with Back Orifice and some other stuff like certain handbooks that can get you in a lot of trouble these days, although not if I leave it on floppies. Probably lucky I don't have a floppy drive anymore just a dual layer case full of floppy disks with very questionable content...

This Tool brings back memories from the past :)

Used it a lot in my early and mid highshool years in the late 2000's and early 2010's.

Capturing passwords, doing some weird things. Combining it and synergizing it with wireshark on my small laptop....

Oh boy,... I'm feeling nostalgic all over again :) It truly was the wild wild west during that time :)

For downloading it you could just look it up in the wayback machine!

eg.

Thank you for the nostalgia!

Now this is a blast from the past!

This was one of the power house tools back in the day.

Has anyone got the old source of this anywhere? What ever happened to the devs of this project?
