Thread: [\[OFFERING\] FULL-STACK & BACKEND DEV | No Project Off-Limits | Bots, APIs, Stores](#)

Doshiiba - March 3, 2026, 9:45 am

? CUSTOM DEVELOPMENT & INFRASTRUCTURE ?

Full-Stack Solutions | Backend Automation | Bots & Tools

Are you tired of hiring cheap "developers" who write broken code, deliver late, or can't understand complex infrastructure?

I am a professional Full-Stack and Backend Developer. I build highly scalable, custom software and web applications.

If you can describe it, I can build it. No project is off-limits. I do not care what you use the code for.

? CORE SERVICES & EXAMPLES

? High-Risk Web Applications & E-commerce

Need a custom storefront for gray-market items? Normal platforms will limit you. Custom Next.js & React Frontends (Premium, dynamic designs that convert).

Offshore Hosting & Cloudflare Configurations (Njalla, FlokiNET, etc.).

Custom Payment Gateway Integrations (Corepay, ccNetPay, WebPays).

Crypto Checkout Integrations (Monero/BTC/LTC).

? Automation & Telegram/Discord Bots

Stop manually doing work. Automate your entire hustle. Custom Notification Bots (Receive instant order data to your phone).

Data Scrapers, Aggregators, and API Integrations.

Auto-responders and Support Ticket systems.

? Custom Tooling & Backend Infrastructure
Bespoke APIs and Database Architecture (PostgreSQL, SQLite, PocketBase).

Web Scraping (Bypassing Cloudflare/Imperva).

Custom Python/Go scripts for testing or targeted automation.

? PRICING & PAYMENT

Quality code is an investment. My absolute minimum project size is \$50.
Every project is quoted at a flat-rate based on the complexity and time required.
Web Apps / Full Websites: Starting at \$200

Custom Bots & Automation: Starting at \$75

Scripts & Custom Tooling: Starting at \$50

These are baseline estimates. PM me with your full project scope for an exact quote.

Accepted Payment Methods: Crypto (XMR Preferred)

PayPal / Wire Transfer / SEPA (Evaluated strictly on a case-by-case basis)

? TERMS OF SERVICE & RULES

1. Payment Structure: 50% upfront deposit is mandatory. The final 50% is paid upon my demonstration of the fully working product on my private test server, before handover.
2. Contracts & Middlemen: I am happy to open an official HF Contract. If you require a Middleman, you are responsible for organizing it and paying 100% of the MM fees.
