Thread: [YouTube TubeIncreaser 2.0 By IRLCash The Real YouTube View Bot That Actually Works](#)

IRLCash - March 3, 2026, 2:30 pm

Nowadays everyone wants to be famous.

More views, more followers, all of that.

It's the name of the game.

But let's be real for a second, grinding for years hoping the algorithm loves you?

Nah that won't work.

You need numbers.

You need social proof.

And you need it now.

This is a fully packaged, ready-to-run Windows application with a clean GUI. (MAC not currently supported - will be supported in future though)

No coding knowledge required.

No terminal commands. Just click, input your video urls + add proxies --> press start & watch it work!

What does it do?

Simple: it sends real, organic-looking views to any YouTube video you want. Each view comes from a fresh browser instance with its own proxy, watches the video for as long as you set (10 minutes default, but you can change it), and clicks the play button just like a real user would.

Why TubeIncreaser 2.0 is different:

? Proxy rotation – Every view uses a different IP from your proxy list. No repeats, no patterns, no red flags.

? Fresh browser per view – Zero footprint. No cookies, no cache, no history linking views together.

? Built-in proxy authentication – Supports user:pass proxies automatically. Just paste your list and go.

? Clean GUI – No ugly command prompts. Just a professional dark-mode interface that anyone can use.

? Undetectable – No automation flags. No "This site can't be reached" errors. Just clean views.

? Portable .exe – Send it to customers. They double-click and it works. No Python, no dependencies, no headaches.

How it works:

Paste your YouTube URL in it.

Load your proxy list (.txt file, one per line in http://user:pass@host:port format)

Set how many views you want and how long to watch

Hit Start and watch the magic happen

The progress log shows you everything in real-time. You'll see which proxy is being used, when the video loads, when it clicks play, and how long it watches. No guessing. No wondering if it's working.

Sounds good, what else is needed to make this work?

To have this tool work flawlessly you need some paid residential/mobile proxies. The more the better.

Why good paid proxies matter:

YouTube is smart. If all your views come from the same IP, they get flagged instantly. TubeIncreaser 2.0 rotates through your proxies so every view looks like it came from a different person in a different location. This is the difference between views that stick and views that get filtered out.

What you get:

TubeIncreaser 2.0 .exe file

Lifetime updates

Basic setup guide (.PDF)

How Much Is This?

There's 2 options available here. I have a basic package & an Elite package (that can be branded to you so you could re-sell for profit)

Price For The Basic: \$499 (one-time, no subscriptions - with lifetime updates) Price increases by \$100 with each sale - limited to 10 copies so it doesn't get saturated.

Your license will work on unlimited amount of machines.

There's a lot of different ways to make money from this.

You can use this for yourself to rank videos, make affiliate commissions or to re-sell views to others. No more using SMM panels that don't work!

Price For The Elite Package: \$999 (I can code it up so it says your name/company in it - perfect for

you to resell & make money with it) Limited to 3 copies only. If everyone started botting YouTube hard tomorrow and getting 200,000+ views in a day they'd know something is up so we have to keep this software limited.

Payment: BTC only.

Start A Contract to order!

1 Discounted vouch copy is available for 50% off to a reputable member with over 500+ posts & an account that is 3+ years old. No further vouch copies will be released so don't ask I will report you for asking.

Screenshot:

Future updates will include the ability to like/dislike videos as well. Remember to get premium paid proxies from a reputable source.

Brah whot? You can't report someone for asking for a vouch copy. Also on topic a 'vouch' copy for 50% off? Stay clear of this imho. Major red flags.

It clearly says vouch copies go to 500 posts and he has under 100. He didn't even read the thread he just wants free stuff? Brah what?

Yeah, I'm not going to give away software that took me time and energy to develop for free. I don't work for free.

If that vouch copy was a \$1 would you have a problem with it? You wouldn't. So it's a matter of price.

This is exclusive software bro this isn't some forum downloads section where you get stuff for free.

If it's better we can take away vouch copies all together and I can charge full price. ?

If the OP explicitly states there are vouch copies available, then it is not a violation if a user asks for a vouch copy. Otherwise, it could get reported as a marketplace violation.

Thank you for the clarification on this.

I see that user has been warned.

I believe it's either because of that low quality one word post or he didn't understand that the 1 single vouch is being given out at a discount to build trust to a member with 500+ posts while he clearly has less than 100.

(Mar 3, 2026 04:38 PM)h4x0rweed Wrote: [\[CITE\]](#) It looks interesting, so those visits that generate monetize? thanks

If the channel is monetized with ads then yes it could generate revenue.

Remember if you buy this, this thing requires high quality paid proxies that cost money.

You'll spend \$20 - \$40 or more a day if you wanted to get massive amounts of views.

I made a mistake giving out 3 vouch copies for my eBook (even though it says \$150 - \$250 investment required in the thread) and not a single one of those people that claimed the e-book for free, made a \$150 - \$250 investment to actually tests the methods.

People like free stuff I get it.

However we as humans don't value free stuff.

We value the things we pay for.

Also I have no way of removing the program from your computer, once you have it, you have it.

You can literally paste it on 100 computers & just run it up.

Do you see the value in that?

New feature added: (You can add likes/dislikes)

More feature's coming soon!

Stanley - *March 4, 2026, 9:40 am*

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
