Thread: [Cybernetics Coding services | C++ Java C# VB.NET | Any project small or BIG](#)

CyberneticsX - March 4, 2026, 2:39 pm

Been returning to the scene. I can code in C++ Java C# and VB.NET. Can also do GUI/UI stuff. Having an extensive experience of around 7+ years, i can code and design your next project with perfection. I pay attention to customer demand, and repetitive requests/changes. I will deliver the code and project ONLY after you are satisfied with the working condition of code/project. Coding assignments small or big, I do them all. I only have one request, don't get on my nerves. When I give you an ETA of completion, don't spam me too much asking "when it will be completed".

I can code anything in the languages mentioned. Small or big, no matter. I DO have the right to refuse to work for you if I deem your coding task not worth my time or skill.

SOURCE CODE of project charged extra.

Need anything coded? just get in touch and let's turn your dream project into reality.

I accept crypto only, no exceptions.

Thank you for reading

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
