Thread: [Free crypts from CyberneticsX](#)

CyberneticsX - March 4, 2026, 2:51 pm

Returning to the scene, been thinking of giving back to the community as I learned A LOT from this place years ago.

Need your file crypted? send it over to me

terms

no money charge for this, free

i do NOT crypt ransomware, don't bother sending such files

i will send crypted file once i crypted it, don't get on my nerves after all this is just a free service

i do not guarantee fud, maybe fud maybe not fud its free so enjoy whatever you get

i can stop this service and close this anytime

zip you file before sending it to me i don't download direct exe's

Definitely check it in an unused VM for multiple days for weird calls or connections, hes pretty new and back in the day it was common for ppl to do free crypts with their binded malware so you work for them spreading their fud dropper and usually infect yourself too. Lots of binded malware has a time limit or clock time to execute so goes unnoticeable

I'd love a test crypt :D Hope you're legit - the world we live in though

Good call

C00Lssh - March 4, 2026, 7:57 pm

very nice of you to do this! i may be in touch!
