What happened to the thread from [Xerotic](#) for the Contract MyCode....and why isnt there just a button to add contract to a thread like hyperlink and image insert?

But I agree with you it should be easier to add contracts.

Thanks. I searched that exact title and nothing came up, just the usual error nothing matches your search. 95% of the time I use search it's garbage in this site.

It's a MyBB issue. The quick search feature doesn't work great. The advanced search works better:
