Thread: [Realistic e-whore instagram help](#)

Jack Daniels™ - March 5, 2026, 10:51 am

So I'm trying to make an e-whore instagram account that looks legit as I can't use snapchat anymore due to not being able to send live snaps. I've got loads of pics etc I can use, but I want to make it look like it's a real girl. Any tips? What are the best ways to get real followers that will like my posts, maybe a couple comments etc that look like the e-whore girl has a good social network? Any tips would be appreciated :)

I think it would be enough to age the account with a couple of saved stories over time. There is no need for actual posts.

You can pick any of the dozen SMM services available.
