Thread: [NovaLink // WEB PORTAL / SIP ACCESS WORLD SPOOF // AI CALLER / CUSTOM CALLER ID NAME](#)

SkyPulse - March 7, 2026, 11:54 am

NOVALINK

? EVOLVING TELECOM INFRASTRUCTURE ?

SIP ACCESS — WORLDWIDE TERMINATION

70+ COUNTRIES — SELF-SERVICE PORTAL — CRYPTO ACCEPTED

Direct SIP access with a dedicated web portal to monitor and manage your account. Request access, get approved, and start calling — everything from one dashboard.

— HOW TO GET STARTED —

1. Submit your access request with your preferred username, fixed public IP, and Telegram Chat ID
2. Pay using one of the listed wallet addresses
3. Add your payment TXID in the request, or send it to Telegram support: @batman31415
4. After TXID verification, your SIP access is reviewed and provisioned
5. Receive your private login path, SIP credentials, and approved IP access
6. Configure Zoiper (or any SIP client) and start calling
7. Monitor your minutes, caller ID, usage, and payment info from your SIP portal

link : [WebPortal - Signup !](#)

— WHAT YOU GET —

- ? SIP credentials (server, username, password) ready for Zoiper / any softphone
- ? Web dashboard to monitor your minutes, balance
- ? Per-minute rates by destination — transparent pricing
- ? Flexible plans — weekly, monthly, daily-limit, or top-up anytime
- ? Caller ID management for active subscribers
- ? Crypto payments (BTC / ETH / USDT and more - PRICING BELOW)

Also available via Telegram bot -> @VoxGBot

CALL — SPOOFED NUMBERS WORLDWIDE

PROJECT ANY CALLER ID – Worldwide numbers spoofing, US/CA, Most of Europe, and many more.

CALL — CUSTOM CALLER ID NAME DISPLAY US/CA

Set ANY Caller ID NAME, for a given DID number and call / drop voicemail with it, the listed features below can be used with the custom caller id name such as voicemail, AI campaign and callback. This is an enterprise grade level feature.

AI AGENTS CAMPAIGN CALLER WITH PROFIL SORTING

This feature is based on the latest academic research in social engineering psychology and AI-driven behavioral analysis, combining a High Quality real-time voice agent and machine learning models for scoring, profiling and classification of human susceptibility to phone-based social engineering.

— HOW IT WORKS —

? STEP 1

You enter a list of numbers, set campaign settings such as AI name, company name, greetings, language, and the number it will call with (spoofed). the system then call one by one each number in

your list.

? STEP 2

once a call is initiated, a live system is deployed, and each interaction tour is classified, you can access the call, check the conversation and transcript live.

? STEP 3

At the end of each call, the system post-analyse the full conversation this time, gives a feedback and return a score based on 7 criteria (below) plus some nice graphics for visualisation.

The AI calls -> The person answers -> The system sort your number list and tells you who you should call back.

The system was fully optimized for real time conversation, the agent can be interrupted while talking, it will adapt to what you say live, it answers in max ~2seconds.

7 Scores Per Call

- Engagement — stayed on the line?
- Naivety — believed everything?
- Urgency — rushed to comply?
- Authority — didn't question who's calling?
- Familiarity — got comfortable fast?
- Resistance — pushed back?
- Disclosure — gave out info?

Each number profile gets a Score from 0 to 100%.
High = easy. Low = hard.

SPOOFED VOICEMAIL DROPS

Deliver voice messages directly into your target's voicemail inbox. The message simply appears by injecting directly into the carrier voicemail layer.

Currently working for US/CA and CH, for other countries voicemail routing varies and requires carrier-specific configuration that varies by region and operator. If this feature is critical to your operations, the target country's voicemail infrastructure will be analyzed and configured.

Specific direct access to voicemail (silent) is also currently available for Switzerland — carrier-level routing for all major Swiss operators is mapped, tested, and production-ready from day one.

CALLBACK MODE

AUTOMATED OUTBOUND BRIDGING — DID REQUIRED

Initiate a voicemail or a missed call displaying a chosen DID. When the target callback, the system instantly bridges the call to your designated destination.

? This feature requires a DID provisioned for the target's country.

The DID acts as the entry point — it's the number the target sees, which routes the answered call back, for bridging to the desired Destination.

VOICEMAIL CAMPAIGN

Launch bulk voicemail campaigns with total automation. Upload your list, select your audio payload, and let the engine execute.

DID rotation for callback mode across your pool
Real-time delivery tracking on every single drop

CUSTOMIZABLE PANEL

if there is something you wish to add, it can be tuned for your needs

PRICING

Spoofing services access -> 69\$

Spoofing services + AI Campaign access -> 200\$

Spoofing services + custom caller id name + AI Campagne access -> 300\$

Voicemail + callback services access -> 49\$

? Bundle All — 500\$?

For calling services you pay per minute at \$0.70/min, you get 70min with the Spoofing access
With AI Campaign access, you can use your regular minutes

For voicemail drops you get 50 voicemails drops with VM/CB access and pay per minute for callbacks

Custom Caller ID : Traffic on these premium enterprise-grade routes is billed at \$1.00/min

Telegram contact for more info : @Batman31415

We can do a demo if interested

Just selling for now, but a sending service is something I'm looking into — might offer that soon.

InsideProxy - March 21, 2026, 2:52 am

hello, u want to collaborate for a business?

plebeo - March 21, 2026, 8:03 am

1. Have you got API?
2. What do I have to do to buy?
3. Where can I see the rates?

I updated the thread with more info, I'm also on telegram if you want to discuss furthermore

Stanley - April 2, 2026, 3:14 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
