Hello,

I have phone number.

If I add this number to Osint tool (epieos.com). It shows me that number was pwned (HIBP).

How can I find where? I need to find name of person which have this number. And e-mail adress if possible.

Any ideas? Thanks.

Using whatever sources are available for that country/region. There's no such thing as a global phonebook, which is what you seem to be asking for.
