Thread: [Kleenscan.biz - AV \ Multi AV Scanner](#)

kleenscan - March 8, 2026, 11:00 am

Need scan? Kleenscan has changed domains to <https://www.kleenscan.biz>!

Scantime Scanner:

? Scan files and URLs in 10-15 seconds. Very fast.

? Uses 37 scanners like Crowdstrike, McAfee, Windows Defender, Emsisoft, NOD32.

Runtime Scanner:

Uses 18 Scanners like Crowdstrike, Windows Defender, Malwarebytes Threatdown

Default scan off Internet, but configure for Internet connect too

Execute and scan any type of file with script in compressed file

Stable and little wait

More features:

Telegram Bot for scan files - <https://t.me/kleenscanbot>

Command Line Tool for easy scan - <https://github.com/ksdev01/kleenscan-cli>

API for scantime and runtime scanners

Python Library to use API simple - pip3 install kleenscan

Updated documentation. Easy understand.

Always:

? No sharing your files. We promise.

? Good price. Save money.

Visit KleenScan now, <https://www.kleenscan.biz>. See if files Clean.

Best scanner , been using for years .

MadScientist - March 8, 2026, 12:17 pm

Good to know the domain changed, great service shocked there's not more in that market anymore.

G/L with the project and business! :D

C00Lssh - March 8, 2026, 2:32 pm

yes, i am glad this one is still around.

thanks for sharing!

Hackers - March 10, 2026, 11:06 am

You live! Nice to know

By the way, if you lock down your signups to use well known email providers or add better captcha or other protections, you might have a better time.

A few users on HF have created auto account signups to use your free scans in API key rotations. Just so you know.

Take a look at how many accounts are owned by same IP, or how many API keys are used by same IP. You might be surprised to see how rampant this has been over the years.

BaaS Josh - March 12, 2026, 11:41 am

Best of the best ++rep

Free scans have been disabled like a year ago iirc.

Yep, though in the past for a while you could even enable runtime scans for free, because there was a package that was set to cost \$0. Don't know if that was on purpose, but must've been costly.

Sheesh, time flies. Didn't know that, or how long it had been since I ran scans on KS.

I used it mostly for static scans, I wanna say there was 5 free scans or something, but honestly don't remember. I still have credits I paid for probably

For a month or so a while back, when the free static scans were still available too, if you went into settings of a free account with no credits, you could "buy" a package of runtime scans for \$0. Don't know what the limit was, I never hit it, though I also didn't abuse it too hard.
