Thread: [\[Service\] Phone Number Validation | Telegram WhatsApp Viber Facebook](#)

alangcn - March 9, 2026, 3:42 am

Large phone number lists often contain a high percentage of invalid or inactive accounts.

Sending messages to bad data wastes accounts, proxies and marketing resources.

This service helps you identify registered and active users from large phone number datasets before running Telegram or WhatsApp campaigns.

?Supported Platforms

?Telegram

?WhatsApp

?Viber

?Facebook

?Zalo

?What We Check

- Whether the number is registered on the platform
- Whether the account shows recent activity
- Additional profile information where available

After validation, you receive a clean dataset ready for outreach campaigns.

?Example Result

Example validation from a dataset of 10,000 numbers

Registered accounts — 3,842

Invalid / unregistered numbers — 6,158

For activity-based checks, the system can further identify recently active users within the registered accounts.

This helps you focus only on real reachable users before starting campaigns.

?Pricing

Price per 10,000 numbers · USDT

Telegram

Presence Check — 1.7 usdt /10,000 numbers

Recent Activity Check — 3.4 usdt /10,000 numbers

Full Profile Check — 7.9 usdt /10,000 numbers

WhatsApp

Presence Check — 0.15 usdt /10,000 numbers

Recent Activity Check — 1.7 usdt /10,000 numbers

Full Profile Check — 5.7 usdt /10,000 numbers

Viber

Presence Check — 0.9 usdt /10,000 numbers

Recent Activity Check — 4.3 usdt /10,000 numbers

Full Profile Check — 11.4 usdt /10,000 numbers

Facebook

Presence Check — 0.7 usdt /10,000 numbers

Zalo

Presence Check — 2.6 usdt /10,000 numbers

?Dashboard Access

Each client receives a private dashboard account where you can upload number lists, run validation tasks, and download filtered results.

The dashboard can be automatically translated into English using the browser translation feature.

?Trial

A 5 USDT trial balance is available for testing.

You can use it to check the system and workflow before placing larger orders.

?Notes

- Bulk orders welcome
- Large datasets supported
- Long-term cooperation available
