Thread: [GOAHEAD.CC | Runtime Scanner | REDEEM YOUR 5 TOKENS. | TEST YOUR CRYPT](#)

am00 - March 9, 2026, 9:24 am

[CLICK ON ME TO SCAN](#)

[Create an account, submit your name here, and I'll give you 5 free scan tokens.](#)

Hey everyone, I'm bringing my project to the marketplace — previously announced on HF:

<https://hackforums.net/newthread.php?fid=299&processed=1>

goahead.cc started from a personal need: a runtime scanner that's actually built with the community in mind — with useful features like customizable sharing links, behavioral analysis, and more to come.

The platform is currently free and in active development, so bugs and rough edges are expected. I'd genuinely appreciate any feedback on features you'd like to see or issues you run into while using it. [In the future, the project will charge per scan]

Thanks everyone — enjoy it.

goahead.cc — runtime malware analysis

Maintenance Notice — 03.09.26

Thank you all for your support so far.

We are currently expanding our platform with additional AV engines. The service will be offline for a few hours while the new engines are integrated and stabilized.

We appreciate your patience — things will be back up shortly.

Maintenance in progress — 03.10.26

We've practically got everything sorted out regarding the addition of the new AVS; we're just running some tests and will be online soon.

We appreciate your patience — things will be back up shortly.

am00 - March 11, 2026, 6:58 pm

[CLICK ON ME TO SCAN](#)

? Maintenance Finish — 03.11.26

Thank you all for your continued support.

Several changes have been implemented in our backend, including a complete transition to a multi-AV analysis system. We apologize for the delay while these improvements were being deployed.

The following AV engines have now been added for testing:

- Avast
- AVG
- BitDefender (API integration still in progress)
- MalwareBytes
- ESET
- 360 Total Security

We are currently optimizing our backend infrastructure. During this phase, scan times may still be slower than usual, averaging around 4 minutes and 30 seconds per scan.

? Known Issues

- Extremely slow scan times
- Detection results may not display the full list of AV engines
- BitDefender may return incorrect or inconsistent responses
- Exact AV detection attribution may currently be inaccurate

Further performance improvements and fixes will be rolled out shortly.

goahead.cc — runtime malware analysis

XDDDev - March 12, 2026, 2:10 am

Trying to use it at the moment, gives detections but the video's show nothing even on the undetected one, kleenscan runtime gives 0 detections. Hi mate, yes I noticed that today while checking the scans, I'll correct the detections brought up by the frontend later today, currently I recommend basing your decisions on viewing the available recording.

Appreciate it, thought i'd give you a heads up incase it wasn't known yet.

Looking forward to seeing it fully complete and another competitor to kleenscan!

CL1B - March 12, 2026, 2:33 pm

Vibecoding can be dangerous [\(Click to View\)](#)

I've been living in your server for some time, until today.

If you don't want to end up as a honeypot, PM me.

Otherwise, I really like this project. UX, is nice and everything is responsive.

Goodluck!

Yes, we've been undergoing maintenance for a day. I'm updating some important items for proper functioning. I'll let you know here when things are more stable. Thank you for your comment.

CHANGELOG — 03.14.26

FIXED? False Positives (Bitdefender) — Reduced false positive frequency.

? Share URLs — Fixed loading failure for non-authenticated users.

? Task Timeout — No longer returns infinite timeout value.

? VM Stability — Unstable virtual machines have been stabilized.

? Security — Multiple vulnerabilities patched.

IMPROVED? WD Log Collection — Optimized via MpClient for more accurate results.

? Analysis Customization — Custom colors and profile photo per analysis tab.

? Watermark System — Now fully customizable per user.

? Custom Share URLs — Users can now define a personalized URL slug for sharing analysis results.

Examples:? INFECTED — goahead.cc/share/quasartest

? CLEAN — goahead.cc/share/puttytest-clean

COMING SOON? Advertisement System — We are rolling out a fully automated and self-serve ad system. Manage and customize your campaigns directly at goahead.cc/advertise.

goahead.cc — runtime malware analysis

am00 - March 16, 2026, 5:15 pm

CHANGELOG — 03.17.26

IMPROVED

? Multi-AV Analysis — Complete overhaul of our analysis engine. The platform now supports multi-AV scanning with the following engines:

Avast

AVG

BitDefender

Malwarebytes

ESET

360 Total Security

Panda

Xvirus

K7

Comodo

? Backend — Multiple internal changes and optimizations applied across our infrastructure.

? VM Screenshots — Analysis results now include screenshots taken directly from the virtual machine, viewable inline on the website without any downloads.

NOTICE

? Scan Times — We are currently optimizing our backend to handle the new AV stack. Scans may take around 5 minutes per submission during this period. We appreciate your patience.

Sorry for the delay — thank you for sticking with us.

The problem has been fixed and you should have received an email a few minutes ago. Please send me your username so I can send you compensation tokens.

ONLINE

CHANGELOG — 03.22.26

[*] Added GIF sharing. [Via URL & Download]

Just create an account and comment your username here and I'll give you the tokens.

[*] Improved file distribution and backend security.

am00 - March 23, 2026, 5:36 pm

CHANGELOG — 03.23.26

[*] Internet access has been added to the machines (can be turned on or off)

[*] More vulnerabilities have been fixed (Kernel & KVM/QEMU)

[*] Small change to the scan results UX.

! Just create an account and comment your username here and I'll give you the tokens.

am00 - March 24, 2026, 7:21 pm

CHANGELOG — 03.24.26

- [*] Reinstalled all VMs from scratch
- [*] Improved file privacy across all VM environments
- [*] Improved VM execution speed
- [*] Improved VM detection across all engines
- [*] Fixed OCR handling within VM context
- [*] Fixed file cleanup process (broken due to incorrect CreateProcessInternalW hook)
- [*] Fixed chkdsk failures occurring during analysis
- [*] Fixed disk corruption issues

[*] I will fix the error of the .NET GUI Framework not running correctly in a few hours.
! Just create an account and comment your username here and I'll give you the tokens.

Stanley - April 18, 2026, 9:13 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Stanley
