Thread: [FULL STACK DEVELOPMENT | WEBSITES, MOBILE APPS, CLOUD | FAST & RELIABLE](#)

**HomeworkGuy** - March 10, 2026, 8:35 am

Professional Development | Custom Software, Web & Mobile Solutions

I provide full-stack development services for startups, entrepreneurs and businesses that need high-quality, scalable and secure software solutions. Every project is built using modern technologies, clean architecture and maintainable code.

Whether you need a website, SaaS platform, automation tool or mobile app, I can handle the entire development cycle from idea to deployment. Also I provide long time professional maintenance services.

## Quick Facts

- Custom development | no templates or generators
- Full source code included
- Secure, scalable architecture
- Regular progress updates
- Confidentiality guaranteed
- Small projects to large systems

## Tech Stack

### Frontend

- HTML5 / CSS3
- JavaScript / TypeScript
- React

- Telegram bots
- Discord bots
- Automation scripts
- Data scraping tools
- Workflow automation

### Why Choose Me?

- Professional development experience
- Clean and scalable architecture
- Clear communication throughout project
- Reliable delivery timelines
- Long-term support available
- Portfolio available on request

### FAQ

Do you provide source code?

Yes. Full source code is included.

Do you support after delivery?

Yes. Support and maintenance can be arranged.

Payment methods?

Crypto / agreed method via PM.

Can you handle complex projects?

Yes, I specialize in scalable systems and custom builds.

First PM Checklist

To get started quickly, include:

- Project description
- Budget range
- Deadline
- Examples or references (if available)

This helps me provide a quick and accurate quote.

Send me a PM and let's bring your ideas to life
