Thread: [DDoS on important Hospital networks](#)

thatcyplex34 - March 11, 2026, 8:00 am

I'm sorry but you have to be such a sore loser if you ever DDoS a Hospital networks for "fun" like you just wake up one day and think to your self "You know what i'm the biggest loser so why don't I just attack a Hospital network even though I'm risking people life who need to be checked in". Like seriously I know you want to brag about that shit but your putting people life on the line just by sending DDoS attacks and trying to infect Hospital networks like that makes you such a loser.

I love how staff simply deletes the original post, making the second post OP.

Shouldn't they just junk the thread?
