Thread: [#1 / SIRIUS-RAT / BEST HACKING TOOL IN THE MARKET / RECOVERY/HVNC/NATIVE/CLIPPER/HRDP](#)

Justified - March 12, 2026, 11:10 am

Sirius RAT

Advanced Remote Administration Tool. Pure C/C++ stub, QT panel. No .NET, no dependencies. Fully native, so independent that it can run in a fresh installed machine. 7/24 Support & Setup included in price.

Prices (Limited time offers)

1 Month - \$150

6 months - \$750

(Setup + 7/24 Support)

XMR, LTC, BTC, SOL, ETH, USDT Accepted.

Core

Encrypted Communication: Custom binary protocol with full traffic encryption.

Native Stub: Zero dependencies, runs on clean Windows. x86/x64.

Persistence: Registry / Scheduled Task with custom install paths.

UAC Bypass: Force-loop mode until Admin granted.

Anti-VM / Anti-CIS / Critical Process marking. (Optional)

Mutex / Custom Icon / Unique builds.

Remote Access

Remote Desktop: Real-time streaming, multi-monitor, mouse & keyboard.

HVNC: Hidden desktop with real latest browser sessions — Chrome, Edge, Firefox, Opera. Profile cloning. Audio capture.

Hidden RDP: Creates hidden admin account, tunnels through reverse proxy. No port forwarding needed.

Reverse Proxy: Tunnel any local service through C2. SOCKS-like. 256+ concurrent connections.

Remote Shell: CMD & PowerShell with live output.

Camera & Microphone: Live feed streaming.

Recovery (Chromium & Gecko — independently toggleable)

Passwords — Full v10/v11/v20 AES-GCM + Chrome v20 ABE bypass, so full recovery.

Cookies · History · Autofill · Bookmarks · Credit Cards · OAuth Tokens.

Crypto: Wallet files (BTC, ETH, XMR..) + 50+ extensions (MetaMask, Phantom, Trust Wallet..) + Trezor.

Messaging: Discord (with live token validation) · Telegram · Signal · Skype · Viber · Element · WeChat + more.

Gaming: Steam · Epic · Battle.net · Ubisoft · EA · Minecraft.

VPN: WireGuard · ProtonVPN · OpenVPN · [censored] · Surfshark · Mullvad · SoftEther · Cisco.

Email: Foxmail · Outlook · FTP clients · MailMaster · MailBird · eMClient

System: Screenshot · WiFi passwords · Product keys · Installed apps · Processes.

Management

File Manager: Browse, upload, download, delete, rename, ZIP, extract, hash, signatures, take ownership.

Process Manager: Kill, suspend, resume, inject DLL, memory dump, enumerate handles.

Service Manager: Full CRUD, startup config, recovery settings.

Registry Editor: Full CRUD, export, search.

Startup Manager / Task Scheduler / Network Monitor / Window Manager.

Monitoring

Keylogger: Real-time + offline mode with window title tracking.

Clipboard Monitor: Live changes with history.

Clipper: Crypto address replacement (BTC, ETH, XMR, DOGE, LTC..) with custom patterns.

Activity Triggers: Window title, process name, keyword typed, idle detection — configurable alerts.

Execution

RunPE: Process hollowing, 32/64-bit, .NET detection, custom host process.

DLL Injection: Direct + Reflective (RDI).

Download & Execute / Script Execution.

Compatibility

Works in every single windows machine. im planning to add MacOS, Linux, ARM and Android support soon. Also, it works with any crypter, including

<https://hackforums.net/showthread.php?tid=6317882>.

Auto-Tasks: Configure per-module recovery that runs automatically on every new connection.

Binance - March 12, 2026, 11:37 am

UI looks cute, not like anything I've seen recently.

Justified - March 12, 2026, 12:35 pm

(Mar 12, 2026 11:37 AM)Binance Wrote: [\[CITE\]](#) UI looks cute, not like anything I've seen recently. its written from scratch, i've been silently working on it for over 4 months. its designed to be AIO tool that can handle thousands of clients in a such smart way. i lose 400 calories on it daily lol. by the way, can you believe that its entirely C++, even the server. no other languages were used.

Justified - March 19, 2026, 2:24 am

Tip : You can recover Foxmail, Thunderbird, Outlook and such mails with SiriusRAT. V20 Recovery, Supports all Chromium and Gecko Browsers.

Apparently, it has one of the best credential recovery that is present on a such native RAT. I'll do Discounts, Let me know.

Transporter007 - March 19, 2026, 3:14 pm

Vouch copy available ?

0x0000 - March 19, 2026, 6:27 pm

Min 6 months — lol xDD

This project looks like a one-day scheme, like most of this forum — aimed at getting a few clients and then disappearing, leaving people without support.

Any respectable product can be rented for one month, not just for six months upfront.

Add one-month plans, provide copies to trusted users with a reputation for detailed analysis — and then maybe you'll start getting sales.
