Thread: [What is your favorite LLM model, and why?](#)

RatWarGun - March 16, 2026, 2:01 am

I've been using LLMs for at least a few years now. Right now, I really like Claude, but it's a bit pricey, so I've been using Gemini for most of my coding projects. Which one is your favorite?

MadScientist - March 16, 2026, 2:43 am

Have you tried Cursor for coding, whatcha think? I only use for general searches/research so GPT is fine for me lately. Gemini was cool

insta_nick - March 16, 2026, 4:38 am

By far Claude is the best. I have been using Claude code daily for a side project for the last 6 months and its the best.

Once I asked Gemini to delete a file (my mistake to ask LLMs to do this) and it deleted my entire code repo. I had to pull it from Github and lost most of my work that day. Since then I stopped using Gemini.

i use gemini nano banana for image generation especially if you're good at prompting you can get a good result it helps me with my graphic design stuff

Rahul007rhp - March 25, 2026, 6:31 am

I just started using KIRO due to my company enforced it so far i like it

hendzabiznis - April 1, 2026, 3:37 pm

Why everybody say Claude is better than ChatGPT?
