All in one Tools

QUIMATROW APP

XLL BUILDER MODULE

"Generates custom Excel Add-in (.xll) files capable of seamlessly and silently downloading and executing embedded files or remote URL payloads in the background."

LNK BUILDER MODULE

"Creates customized Windows Shortcut (.lnk) files designed to silently fetch and run files from a target URL or execute embedded files flawlessly."

CHM BUILDER MODULE

"Compiles Compiled HTML Help (.chm) files that can stealthily extract and execute embedded files or silently download and run target URL payloads."

MSC BUILDER MODULE

"Builds custom Microsoft Management Console (.msc) snap-ins featuring the ability to silently download and execute embedded files or remote URL resources without interruption."

CPL BUILDER MODULE

"Develops custom Control Panel (.cpl) items that allow for the flawless, silent execution of embedded files or automated downloading and running from a specific URL."

SCRIPT BUILDER MODULE

"Transforms standard executables into stealthy, native Windows scripts (VBS, JS, BAT), designed for the silent downloading and execution of remote payloads without relying on traditional binary files."

MACRO BUILDER MODULE

"Embeds advanced execution logic into macro-enabled Office documents (.docm, .xlsm), utilizing VBA to securely drop and silently run embedded or URL-based payloads upon document initialization."

EXE LAUNCHER MODULE

"A deployment utility that securely wraps standard executables, capable of silently downloading and executing URL-based payloads in the background."

JAR LAUNCHER MODULE

"Executes Java Archive (.jar) files seamlessly on target machines, functioning entirely independently without requiring Java (JRE/JDK) to be installed on the system."

GOLLUM - March 21, 2026, 12:58 pm

which is the most effective?

bay.albatros - March 21, 2026, 1:20 pm

(Mar 21, 2026 12:58 PM)GOLLUM Wrote: [\[CITE\]](#) which is the most effective?

Of course, they all have different ways of being used and working....
But....

Ultimately, their goal is the same :)
To download (or extract) and run files... :)

The "most effective" choice depends entirely on the user.

Does ink builder support custom icon and bypassed WD on runtime?

bay.albatros - March 25, 2026, 8:33 am

(Mar 25, 2026 12:10 AM)Workhard3105 Wrote: [\[CITE\]](#) Does ink builder support custom icon and bypassed WD on runtime?

Yes, the LNK Builder supports custom icon spoofing.
As for WD, the execution method itself bypasses runtime detection...

julp - March 27, 2026, 12:22 pm

.xll bypass chrome browser ?

bay.albatros - March 27, 2026, 12:29 pm

(Mar 27, 2026 12:22 PM)julp Wrote: [\[CITE\]](#) .xll bypass chrome browser ?

All formats, including XLL, can be downloaded without any warnings using Chrome.

ghoostmood - March 28, 2026, 2:15 am

Nice work, I will try it out and give another review

You can check PM.

cisworker - April 1, 2026, 5:08 pm
I bought the XLL exploit for a month.
The exploit works well; it works even if the executable RAT is detected by antivirus software. I really like it.
It's not really suitable for my target audience, though, since it always shows up as a MOTW on my .xll file, but the seller helped me find a solution, and I had my first log up in literally 15 minutes =)

Thank you so much for your wonderful feedback!
I'm really glad to hear that XLL Builder worked well for you.
Providing powerful tools and robust support is my top priority.
If you need any further tips or future support, I'm always here.
