Thread: [\[Guaranteed\] Make from \\$1000 - \\$40,000 monthly with this method](#)

moonlig152 - March 17, 2026, 7:07 pm

Hello everyone! Sharing with you today a method that many asked me in the comments to share a thread about, and here I am..... before we start: I am not selling anything and not giving any paid mentorship...

The method I am talking about today is IPTV, and if you follow my guide it will allow you to make, based on your marketing, from \$1000 to \$20000 or more, depending on your work...
My team made \$71k this month, but we have a team of 5 in marketing only.

We will need many tools, but I will list them here for you so you will know your path to follow:

The most important 2 doors are IPTV website and marketing. For each door there are many ways, so we will knock them one by one.

[hide]

For IPTV website there are 2 ways.

The 2nd way is the one we are using with my team and will be the cheapest for you. will cost you starting from \$20.

The 1st way will cost you between \$100 - \$150

1st way

Find a good IPTV supplier (a panel). This will allow you to give your clients credentials to access the IPTV servers.

You will need to pay around \$70 to \$120 for credits. This will give you around 120 credits, and each credit means 1 month.

A domain name between \$2 and \$10 if you buy .com, and .com is better.

Hosting: start with a cheap host (\$2/month).

IPTV template will cost you around \$15 - \$40.

Payment method: you can start with Wise and PayPal.

How you will do it:

First, you will link your domain with your hosting, then activate SSL. Next, you will need to upload your template...

All templates have a way of ordering through WhatsApp, so you will link your WhatsApp, edit your pricing, and your website is good to go.

Then based on each client, you will ask him to pay... you can also allow free trials depending on the panel you are using.

2nd way

This way is smoother.

We will use a platform called Glanfy, it's like Shopify for IPTV. All you need is your domain name and an active plan starting from \$6.99/month.

You don't need to buy credits, you only pay after you sell.

They already have many templates to choose from, select one, click install, and you are good to go.

They also have instant delivery and many other things, better to discover by yourself.

Marketing :

Now after your website is ready, we will start the marketing.

I will share some, but if you need a detailed thread about this method, let me know in the comments, I will do it for sure.

Social media ads: target a country or region and start your campaigns. Don't focus on one place like IG, mix it, do TikTok, IG, FB, X...

Reddit: post about your IPTV website, let others know your website.

SEO: if you are using Glanfy they will take care of this part, if it's your own website try to learn about SEO.

YouTube: find sport recaps and start sharing your website in comments.

Mails: grab a good mailing list and start sending them emails about your IPTV website.

....

if you ask me if this job is dead or has too much competition, I will tell you that you are wrong. We just entered this field about 6 months ago. Yes, there are competitors, but as we know, every way that has a lot of money has competition.

Until now I think things are clear, all you need is to start and go to make your first 100k online.
