Thread: [REQ: APK FUD ENCRYPTION | BYPASS PLAY PROTECT APP BLOCKED](#)

lordlogic - March 18, 2026, 10:42 pm

Hello,

I want to crypt my apk to just bypass play protect on OnePlus device which is on Android 16 for personal use.

Can anyone help me with that? If for free that would be great, otherwise I can pay 10\$ max. Any help will be appreciated.

Thank you,

lordlogic - March 20, 2026, 10:01 am

No reply yet? Hackforum was very helpful years ago. Now that I have come back after many years for a personal reason, I see lots of things have changed.

10\$? Is hackforums dead? you are a joke

InterFear - March 30, 2026, 6:35 am

Hack forums.net is dead? You are broke and offer nothing to the table. Do you think anyone wants to help someone for \$10? Do you know how tough it is to maintain a good encryption? Are you genuinely retarded? I will not even comment further, what a joke.

lordlogic - March 30, 2026, 8:46 am

If it were because of money, any genuine person would have given counteroffers. Or at least guide me to the right person, because I have already lost lots of money to scammers, so I no longer trust any random person. I am not saying HackForums is dead because no one is taking my request for 10\$ but because there is no response at all. Years ago, some people would help you not for money but because they could. So learn to talk first.
