Hello Petrov,

I am definitely interested. I have extensive experience managing my own PayPal Business accounts and successfully navigating the entire KYC process. In fact, I run my own business where I provide fully verified and KYC-cleared accounts to other clients.

I am an expert at handling documentation, verification hurdles, and ensuring account stability for high-volume operations. I'm confident I can deliver the results you're looking for.

Please share your Telegram handle and I will reach out to you immediately.

Best regards,

Hi everyone - after lengthy discussions with a prospective partner on this project, it doesn't seem like it will work out with that person for now due to a shift in requirements on my side.

Applications are back open now. Please post once again if you have experience and are still interested.
