MEXC Crude Oil Futures Trading Volume Surges 1,217%, Daily Volume Exceeds \$1.1 Billi

MEXC reported a 1,217% surge in crude oil futures trading volume, with daily activity surpassing \$1.1 billion amid rising global oil market volatility. User participation jumped 337%, with nearly all traders new to oil derivatives on the platform. Zero fees, deep liquidity, and 24/7 crypto markets helped MEXC attract capital and expand trading during fast-moving conditions.
