Thread: [Would you use an HF related cryptocurrency / token?](#)

Hackers - March 23, 2026, 11:32 am

Just curious. If there was a reliable token that had liquidity for bytes on/off ramp and conversions to popular coins (USDC, USDT, Ether, BTC, etc)... Would you use this for anything?

Yes I will use this for sure and if possible to have more development around the use cases , it a lovely concept to have.

Would you still use it if the amount of bytes you had to pay was slightly more expensive than buying the HF tokens with USDC or another crypto? We would need to make sure the ledger could stay balanced, so it might need 2.5-5% padding on bytes transfers to make sure the system can't lose money as easily.
