Thread: [Visa Appointment Auto-Booking](#)

Carazy - March 26, 2026, 2:39 am

Hello, I need someone that has expertise in reverse-engineering sites, APIs etc. You need to be able to bypass anti-bot measures etc.

Basically I'll provide you a website that if you manage to book visa appointments faster than other people, its pretty good money and it won't be a one time payment either so we can go for long term.

Please note this is not simple web-automation process you can just vibe code using selenium etc.. You need to have actual experience to get it done. PM Me for more details.

Visa appointments are usually not gov websites, all though ur right some are gov sites. The sites I'll be giving are usually third party vendors that provide these appointment services.
