Thread: [Bluekit - all in one red team kit, 40+ templates, evilginx, voice cloning and more](#)

petrushka - March 26, 2026, 5:36 am

Hello!

I'd like to invite anyone interested to try out my new dashboard (actively developed and currently in beta version): [deleted]

This dashboard is primarily intended for security researchers (from red teaming sector). It was created as an alternative to the popular and well-known Evilginx Pro and all their resellers like Tycoon2FA or EvilProxy.

The main difference is that the service is fully managed by us and has a lower entry barrier. Anyone can purchase a subscription and start using the dashboard right away. There's no need for ridiculous verification or compromising your privacy just to gain access. You don't have to be an employee of any company or send us your LinkedIn account.

What exactly do we offer:

- * Ready to use 40+ website templates that are 1:1 as original websites
- * We can add new as quickly as you can request them - just send the url
- * The subscription includes access to ALL available templates - not just one selected
- * Automated domain purchase and registration process - you can buy a domain through our dashboard
- * Fully working 2FA support with emulation and spoofing of geolocation and browser information so the 2FA prompts do not look suspicious
- * Telegram, in browser native notifications and website "auto refresh" when any new event is detected - you stay updated
- * Advanced antibot cloaking system that you can fully configure so your site stays stealth
- * Not only capturing cookies but also local storage and all keyboard input
- * Everything with anonymity, you can register using Tor Browser and pay via using Monero (XMR)
- * We store minimum data and hash all passwords using Argon2
- * Ability to host your own website files
- * Frequent updates and consideration of customer feedback
- * Bulletproof and decentralized infrastructure
- * Additional features as: ai assistant, vm checker, voice cloning, mail sender and much, much more

Subscription prices:

7 days - \$90

14 days -> \$180 \$170

30 days -> \$385 \$350

We aim to continuously develop our dashboard with new features, both those we plan ourselves and those you request.

We are also open to collaboration on any other matter requiring technical skills. If you need any software or technical support, simply contact us and we're sure to find a solution.

I believe the dashboard demonstrates my team's capabilities. We are capable of doing anything as long as it brings money.

Feel free to get in touch
